Product Brief
Team 1

Product name:
Schoolify

Purpose of the product:
An online school administration system for students, parents and teachers.

How it differs from competitor's product:
This product differs by offering an easy and intuitive experience for both students and parents to interact with teachers. Information will be accessible to student/parent/teacher based on the sensitivity of the information.

Features:
- Teachers can provide students with study material.
- Parents and teachers can communicate regarding a students performance and behaviour in class.
- Students can submit homework which can then be viewed by both parents and teachers.
- Grades for homework and tests can be posted.
- Chat room service between students and teachers.
- Product will be scalable and new features can constantly be added.

Main competitors:
- OpenSIS - annual fee (interfaces with Moodle).
- Aladdin - annual fee (targeted at Irish secondary schools).
- Canvas - free with paid version.
